Forecast for Wednesday 23 Sep 2020

Weather: Heavy and persistent rain will arrive overnight with fog where low cloud covers the hills. Persistent rain will gradually ease in the morning, quickly followed by scattered showers. Low cloud will also lift, although skies will stay largely cloud until the evening. Showers will come and go through the day but should be fairly light.

Chance of cloud free mountain/hill tops above 600m: 10% overnight with cloud bases down to 300m at times, particularly in heavier bursts of rain. Improving to 100% through the morning as cloud bases lift above tops.

Visibility: Generally around 40km. However, 8000m in light showers, 3000m in heavy rain and 100m in fog.

Forecast for Thursday 24 Sep 2020

Weather: Heavy showers will arrive overnight and persist through Thursday. The showers could band together at times to bring more persistent spells of rain. Showers will be blustery with a risk of hail and thunder in the heaviest downpours.

Maximum wind: Southwesterly 20 mph gusting 30-40mph in heavier showers during the morning.

Chance of cloud free mountain/hill tops above 600m: 90 %. Cloud bases could lower to 400m as heavier showers pass through.

Visibility: Generally 50km, but 3000m in heavy showers.

Temperature: **Valleys:** Plus 3 Celsius, becoming plus 12 Celsius.
At 600m: Plus 6 Celsius.
Freezing level: Above tops.
